

# ChargePoint Platform for Fleets with CP6000

Optimizing your fleet operations with depot charging solutions

## Manage Fleet Charging and Control Operating Expenses

Fleet electrification can seem complex - balancing infrastructure, utilities, and new costs while maintaining operations. ChargePoint simplifies it with scalable solutions that reduce expenses and emissions at every stage of your transition.

### Cut costs and emissions

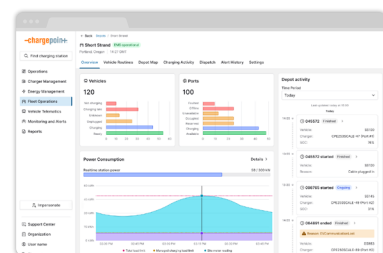

Unlock up to 25% savings in total cost of ownership and cut emissions by up to 50% through intelligent fleet charging and energy optimization.

### Simplify deployment

From initial assessment to full-scale rollout, ChargePoint coordinates site design, permitting, equipment, and construction oversight to keep projects on track.

### Ensure reliability

ChargePoint Assure Pro® provides mission-critical uptime with 24/7 expert response, proactive monitoring, annual maintenance, and 99% coverage.

### All-in-one platform

The ChargePoint Platform unifies your fleet and fuelling operations into a single, powerful command centre.

- + **Fleet Operations** – automated power distribution and real-time session monitoring
- + **Complete Control** – reports to understand station usage, utility costs, environment impact and more
- + **Charger Management** – monitor sessions, troubleshoot remotely, manage pricing and energy policies

## ChargePoint® CP6000

### High output, reliable AC charging for any EV

The CP6000 meets the most advanced technical and regulatory requirements in Europe and the UK, combining high-output charging with enhanced durability. It reduces the total cost of ownership with an easy-to-service design, making it ideal for delivery and logistics, passenger transportation, and other fleets.

The modular, individually replaceable head units, cables, screens, and other components simplify station servicing and repairs

Deliver up to 22 kW per port with unparalleled quality and reliability in a cost-effective package

Display pricing, instructions and charging status with a 20 cm interactive display supporting multiple languages, video uploads and gesture controls

Reliable cellular connectivity and OCPP communication connect you to the ChargePoint Platform so you can manage your charging program with ease

Allow authorized drivers to start charging with multiple authentication methods, including RFID cards, tap to charge (NFC) a mobile app

Simple and robust stations tested for heavy daily usage and exposure to the elements with modular, individually serviceable components

#### Pedestal mount

dual port,  
integrated 5.5 m cable

dual port,  
socket

#### Wall mount

dual port,  
integrated 5.5 m cable

dual port,  
socket

## Let's get started

We're always here to help you identify your charging goals, advise on the best approach and help evaluate your site.
