

Easy workplace charging with ChargePoint

Achieve sustainability goals and offer the best EV charging experience to your employees

Your employees are shifting to EVs. Are you ready?

The adoption of EVs in Europe is increasing rapidly. According to the BNEF, almost 40% of European passenger vehicle sales are expected to be electric by 2035. These trends will continue, especially with conversations around sustainability hitting peak momentum and more affordable EV options becoming available. With electricity becoming a popular fuel for transportation, employees view EV charging solutions as a sustainability credential and a benefit from their employer. **They expect you to keep them charged.**

Why offer EV charging at your office

- + Attract and retain top talent
- + Improve the employee experience
- + Achieve corporate environmental targets
- + Become a sustainability leader
- + Showcase your environmental impact

Provide the best EV charging experience with the least effort

The ChargePoint solution gives companies complete control over charging pricing, access and energy usage. With ChargePoint as a partner, you get help every step of the way — from easy installation to a 24/7 driver support line — while employees enjoy a seamless charging experience.

Why 76% of the Fortune 500 trust ChargePoint

- + **15+ years** of EV charging experience
- + **Waitlist feature** to maximise station utilisation and keep drivers charged up
- + **Top-rated driver app** for both iOS and Android
- + **800,000+** metric tons of greenhouse gas (GHG) emissions avoided by businesses that choose ChargePoint

Having ChargePoint at LinkedIn supports the goals we're trying to achieve, in terms of engaging our employees in this environmental mission, powering them to have an impact every day when they come to work.

Unlock the benefits of a smart, networked solution

A networked solution connects your individual charging stations and enables you to manage your EV charging programme more efficiently — and save money. The smart, cloud-based solution from ChargePoint lays the foundation for your charging ecosystem and gives you total control. You can set custom tariffs, create driver groups, monitor station utilisation, remotely manage station access and more.

Offering EV charging shouldn't break the bank

While government grants can lighten the burden of your upfront expense, it doesn't take away the ongoing complexities of managing — and paying for — your charging solution from day to day. So take it easy with ChargePoint as a Service® (CPaaS).

CPaaS is an easy and cost-effective subscription solution, providing monitoring, management and upgrades in one bundle. ChargePoint as a Service gives you access to the highest quality EV charging hardware, the world's leading open charging network and the solution benefits of your choice.

Benefits

- + Lower the total cost of ownership of the charging stations
- + Reduce upfront costs for infrastructure
- + Lower operational expenses with power management
- + Intelligently share energy between stations, manage energy consumption and measure your emission reductions
- + Monitor stations remotely to maximise utilisation
- + Control who can access your stations and set company pricing policies
- + Get alerts about potential problems to avoid downtime

Find the right solution for you
