automotive
industry

The leading EV charging software for the automotive industry

The automotive industry is quickly moving towards electrification, increasing its investments in the EV charging business. With a growing e-mobility ecosystem, the automotive sector is pushing EV charging coverage globally. Customer ownership becomes a priority – whether that’s protecting existing relationships or creating new ones. And that’s because generating additional revenue streams is essential for the entire auto industry.

The be.ENERGISED EV charging solution: Fastest go-to-market

be.ENERGISED helps you secure customer ownership with future-proof EV charging technology. The solution meets all your EV charging needs – from worldwide charging and customer ownership to individual pricing options and complex tariff management. It also handles integrated payment, tax and legal frameworks, and administration.

Get started and grow your EV business today!

Key benefits

Fastest go-to-market

Maximise your e-mobility business along the EV value chain and offer ready-to-go services.

Seamless EV driver experience

Offer your EV drivers a seamless, transparent charging experience available anywhere and anytime, so they don't have to worry about EV charging.

Full customer ownership

be.ENERGISED offers individual pricing options and handles complex tariff management – while you own the entire customer relationship.

Generate new EV revenue streams and secure full customer ownership

With be.ENERGISED, the white-label EV charging software solution, the automotive industry has access to a scalable and trusted EV charging product. Its support services ensure you can provide a flawless customer experience too. Setting up scalable charging infrastructure and integrating be.ENERGISED in your IT ecosystem means you secure your future sustainable business.
